Gainesville, FL 32611

Editorial Production, John Wiley: Merilee Croft Olson

The *Journal of Computational Chemistry* (ISSN: 0192-8651) is published 16 times a year, monthly and semi-monthly in January, April, July, and November, one volume per year by John Wiley & Sons, Inc.: 605 Third Avenue, New York, NY, 10158.

Copyright © 1997 John Wiley & Sons, Inc. All rights reserved. No part of this publication may be reproduced in any form or by any means, except as permitted under section 107 or 108 of the 1976 United States Copyright Act, without either the prior written permission of the publisher, or authorization through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923; tel: 508-750-8400, fax: 508-750-4470. Periodicals postage paid at New York, NY, and at additional mailing offices.

The code and the copyright notice in the journal indicate the copyright holders consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 and 108 of the United States Copyright Law. The per-copy fee for each item is to be paid through the Copyright Clearance Center, Inc.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription price (Volume 18, 1997): $1,012.00 in US, $1,172.00 in Canada and Mexico, $1,276.00 outside North America. All subscriptions outside US will be sent by air. Payment must be made in US dollars drawn on a US bank. Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits. Please allow four weeks for processing a change of address. For subscription inquiries, please call 212-850-6645; E-mail:SUBINFO@jwiley.com

Postmaster: Send address changes to *Journal of Computational Chemistry*, Susan Swanson, Director, Subscription Fulfillment and Distribution, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. For subscription inquiries, please call customer service at 212-850-6645 or write to the above address.

Advertising: Inquiries concerning advertising should be forwarded to Susan Levey, Advertising Sales, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. 212-850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO 19 1UD, England.

Reprints: Reprint sales and inquiries should be directed to the customer service department, John Wiley & Sons, Inc., 605 Third Ave., New York, NY 10158; tel: 212-850-8776.

Manuscripts should be submitted to one of the editors: Dr. Norman L. Allinger, *Journal of Computational Chemistry*, Department of Chemistry, The University of Georgia, Athens, GA 30602; Prof. Dr. Paul von R. Schleyer, *Journal of Computational Chemistry*, Computer Chemistry Center, Institut für Organische Chemie, Universität Erlangen-Nürnberg, Henkestr. 42, D-91054, Erlangen, Germany; or Prof. Gernot Frenking, *Journal of Computational Chemistry*, Fachbereich Chemie, Philipps-Universität Marburg, Hans-Meerwein-Strasse, D-35032 Marburg, Germany. *Information for contributors* appears in the first and last issue of each volume. *All other correspondence* should be addressed to *Journal of Computational Chemistry*, Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons Inc., 605 Third Avenue, New York, NY 10158.

The contents of this journal are indexed in the following: *Chemical Abstracts, Chemical Titles, Current Contents/Physical, Chemical, & Earth Sciences, Mathematical Reviews, Reference Update, Research Alert (ISI), Science Citation Index (ISI),* and *SCISEARCH Database (ISI).*

This paper meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of paper).

Review of *Reviews in Computational Chemistry, Volume 7*, 1327

Journal of
Computational
Chemistry

Subject Index to Volume 18

Ab initio calculations, basis sets for second-row atoms, 1200
Ab initio calculations, basis sets superposition error in, 694
Ab initio calculations, configuration interaction, 1329
Ab initio calculations, core-valence separation in localization, 431
Ab initio calculations, effective core potentials in, 1918
Ab initio calculations, fast geometry optimization for, 1473
Ab initio calculations, $[H4, Si, P]^+$ potential energy surface, 9
Ab initio calculations, of bond force constants, 1664
Ab initio calculations, of correlation energy, 1407
Ab initio calculations, of Diels—Alder reaction of phosphole, 198
Ab initio calculations, of electron density functions, 2023
Ab initio calculations, of isodesmic reaction energies for small rings, 108
Ab initio calculations, of polarizability of carbon and silicon cubic crystals, 1253
Ab initio calculations, of proton transfer in zeolites, 562
Ab initio calculations, of resonance energies, 584
Ab initio calculations, of rotational barriers of silanes, 1523
Ab initio calculations, of singlet oxygen addition to ethenol, 1668
Ab initio calculations, of the conformations of α-L-fucose, 330
Ab initio calculations, of van der Waals parameters, 211
Ab initio calculations, on allyl cations, 533
Ab initio calculations, on ammonium salts, 1371
Ab initio calculations, on β turns in peptides, 1415
Ab initio calculations, on delocalized cations, 28
Ab initio calculations, on diborylmethane, 1792
Ab initio calculations, on fluoroethane/hydroxyl reaction, 1190
Ab initio calculations, on HIV-1 protease inhibitors, 1151
Ab initio calculations, on hydrogen peroxide dimer, 1124
Ab initio calculations, on ionic surfaces, 617
Ab initio calculations, on keto-enol tautomerization, 56
Ab initio calculations, on methane/neopentane dimers, 70
Ab initio calculations, on neighboring group participation, 1773
Ab initio calculations, on 1,5-cyclooctadiene, 254
Ab initio calculations, on oxane and dioxane derivatives, 1392
Ab initio calculations, on phosphaacetylene-diazomethane cycloaddition, 609
Ab initio calculations, on tetramethylammonium ion/aromatics binding, 2012
Ab initio calculations, on vitamin D, 1647
Ab initio calculations, on water complexes, 1124
Ab initio calculations, parallel computing of Hartree-Fock energy second derivatives, 159
Ab initio calculations, pseudopotentials in, 416
Ab initio calculations, relativistic corrections in, 20
Ab initio calculations, relativistic, on xenon fluorides, 601
Ab initio calculations, universal Gaussian basis sets for, 1565
Ab initio calculations, use of symmetry in two-electron integrals, 971
Ab initio calculations, with parallel processing in configuration interaction, 430
Ab initio/molecular mechanics, combined calculations, 463, 1061, 1484, 1496
Acetylacetone enol, proton transfer in, 368
Acetylacetone, proton transfer in, 1760
Activation energies, of solid-state reactions, 393
Alanine dipeptide, conformational sampling of, 1750
Alanine dipeptide, dynamics of, 1440
α-L-fucose, conformations of by *ab initio* and density functional theory calculations, 330
Allyl cations, *ab initio* and molecular mechanics calculations of, 533
Ammonium salts, *ab initio* and molecular mechanics calculations on, 1371
Argon clusters, global minimum of, 2040
Aromatic hydrocarbons, proton affinities of, 629
Atomic charges, from density functional theory calculations, 522
Atomic charges, from semiempirical methods, 744

Bacteriorhodopsin, calculations of electrostatics of chromophore interactions, 677
Band gap problem, in density functional theory, 1943
Basis sets, for second-row atoms, 1200
Basis sets, Gaussian, universal, 1565
Basis set superimposition error, correction of, 694
Bending, out-of-plane, calculations, efficient, 1804
Benzene, *ab initio* calculations on binding with tetramethylammonium ion, 2012
Benzofuroxan rearrangement, density functional theory calculation of, 489
Bond, force constant, field dependence, 1664

Brownian dynamics, simulations of DNA reactions with hydrated electrons, 888

Carbohydrates, force field for, 1955
Carbó molecular similarity index, 151
Carbon cubic crystals, *ab initio* calculations of polarizability of, 1253
Chromatography, effect of surface property descriptors on, 182
Cluster, argon/xenon, energy minimization of, 1096
Cluster methods, for studying peptide conformations, 1295
Clusters, global optimization of, 1233
Clusters, Mg^+Ar_n, optimization of, 1011
Clusters, of argon atoms, global minimum of, 2040
Configuration interaction calculations, 1329
Configuration interaction, with parallel processing, 430
Conformational analysis, using cluster methods, 1295
Conformational energies, molecular mechanics calculations of, 1056
Conformational sampling, by Monte Carlo methods, 2086
Conformational sampling, rapid method for, 1750
Conformational searching, for macrocyclic molecules, 277
Conformational searching, method for peptides, 1971
Conformational searching, with stereo chemistry, 1264
Conformational space annealing, 1222
Conjugated π cations, calculations on, 28
Core-valence separation, 431
Correlation energy, calculation of with neural networks, 1407
Crystal indexing simulated annealing, 290
Crystal structure, prediction of, 1036
Cycloaddition, between phosphaacetylene and diazomethane, *ab initio* calculations on, 609

Database, efficient searching of, 1812
Delocalized π cations, 28
Density functional theory calculations, band gap problem in, 1943
Density functional theory calculations, for chromium, molybdenum and Tungsten derivatives, 1985
Density functional theory calculations, of benzofuroxan rearrangement, 489
Density functional theory calculations, of bonding to silicon surfaces, 2075
Density functional theory calculations, of charge distributions, 522
Density functional theory, calculations of electrostatic properties with, 980
Density functional theory, calculations of NMR shielding, 126
Density functional theory, calculations of the conformations of α-L-fucose, 330
Density functional theory, calculations on basis set superposition error in, 694
Density functional theory calculations, on diborylmethane, 1792
Density functional theory calculations, on glycine, 1609
Density functional theory, calculations on hydrogen peroxide, water complexes, 1124
Density functional theory calculations, on solvent effects in proton transfer, 1993
Density functional theory calculations, performance tests of, 1534
Density functional theory calculations, limitations from degenerate states, 260
Density functional theory calculations, molecular energies and properties from, 775
Density functional theory calculations, performance of various density functionals in, 775
Density functional theory calculations, quality of functionals for various properties for HF clusters, 1695
Density of states, calculations of, 1312
Deoxyribonucleic acid, see DNA
Diabetic ordering, normal modes, in reaction studies, 1282
Diborylmethane, quantum calculations on, 1792
Diels–Alder reaction, *ab initio* calculations on phosphole, 198
Dioxane derivatives, *ab initio* calculations on, 1392
DNA bases, interaction energies of, 1136
DNA, internal coordinate modeling of, 1043
DNA, low-frequency normal modes of, 796
DNA, reactions with hydrated electrons, 888
Docking, efficient, and database searching application, 1812
Docking, methods for, 1175
Dynamics, essential in proteins, 169

Effective core potentials, 1918
Electron correlation, in trithiocarbenium ion and radical dication, 1023
Electron correlation, MP2, by parallel computing, 552
Electron density, topological analysis of, 416
Electron integrals, use of symmetry in calculation of, 971
Electron localization, 431
Electronic density functions, representations of, 2023
Electrostatic calculations, increased accuracy by harmonic dielectric smoothing and charge antialiasing, 268
Electrostatic interactions, Ewald summation of, 660
Electrostatic interactions, in molecular dynamics, 1848
Electrostatic interactions, of chromophore-protein in *bacteriorhodopsin*
Electrostatic potential, conversion to atomic charges, 744
Electrostatic potential, Poisson–Boltzmann equation calculation of, 342, 1570, 1591
Electrostatic potentials and properties, from density functional theory calculations, 980
Electrostatic potentials, based on semiempirical wave functions, 1682
Electrostatic potentials, from semiempirical calculations, 301, 955

Electrostatic potentials, in solvation, 313
Electrostatic potentials, non-atom centered in molecular mechanics, 1632
Electrostatics, rapid evaluation in molecular dynamics, 1729, 1785
Energy minimization, by the genetic algorithm method, 1233
Energy minimization, line search methods for, 1011
Energy minimization, of argon/xenon clusters, 1096
Energy minimization, of polypeptides, 403
Energy optimization, in delocalized internal coordinates, 1079
Energy optimization, of crossing points between potential surfaces, 992
Ewald summation, for calculation of electrostatic interactions in solids, 660
Ewald sums, for van der Waals potentials, 1365

Force constant, bond, field dependence, 1664
Force constants, semiempirical calculation of, 2050
Free energy calculation methods, comparison of, 902
Free energy perturbation calculations, using Ewald sums, 1365

General valence bond calculations (see valence bond calculations)
Genetic algorithm, for clusters, 1233
Genetic algorithm, for energy minimization of clusters, 1096
Genetic algorithm, for peptide conformational searching, 1971
Geometry optimization, fast, in *ab initio* calculations, 1473
Geometry optimization, using natural internal coordinates, 45
Global minimum problem, general approach to, 2040
Global minimum, location of, multiple minima problem, 594
Glycine, *ab initio* and DFT calculations on, 1609

HIV-1 protease inhibitors, *ab initio* calculations on, 1151
HIV-1 protease inhibitors, charge distributions in, 522
Hydration, free energies of, 449, 1320
Hydration, free energies of, for small molecules, 902
Hydrogen bonding, from crystallographic database, 757
Hydrogen bonding, in polyalanine helices, 1245
Hydrogen bonding, theory and experiment, 2060
Hydrogen fluoride clusters, density functional calculations on, 1695
Hydrogen peroxide dimer, quantum mechanical calculations on, 1124
Hydroxyl, reaction with fluoroethane, 1190

Improper torsion calculations, efficient, 1804

Keto-enol tautomerization, *ab initio* calculations on, 56
Kinetics, methods for treatment of for complicated systems, 1903

Lewis acid-base interactions, in molecular mechanics, 1211

Macrocyclic molecules, conformational search of, 277
Madelung potential, in ionic surfaces, 617
Master equations, solution of in unimolecular theory, 1004
Methane/neopentane dimers, *ab initio* calculations on, 70
Molecular dynamics calculations, essential, in proteins, 169
Molecular dynamics calculations, on polymers, 1354
Molecular dynamics calculations, program for, 1848
Molecular dynamics, constraint solver for, 1463
Molecular dynamics, fast methods for, 1785
Molecular dynamics, for the study of solvent effects, 313
Molecular dynamics, of alanine dipeptide, 1440
Molecular dynamics, of a protein, 1546
Molecular dynamics, parallel computing in, 478, 501
Molecular dynamics/quantum mechanics method, 1760
Molecular dynamics, rapid evaluation of electrostatics in, 1729
Molecular dynamics, umbrella sampling in, 1450
Molecular geometry, general bookkeeping of coordinates, 1513
Molecular mechanics/*ab initio* combined calculations, 463
Molecular mechanics calculations, carbohydrate force field for, 1955
Molecular mechanics calculations, efficient out-of-plane bend in, 1804
Molecular mechanics calculations, for conformational analysis of neolignans, 712
Molecular mechanics calculations, for conformational searching, 1264
Molecular mechanics calculations, of amine/ketone interactions, 1211
Molecular mechanics calculations, of conformational energies, 1056
Molecular mechanics calculations, of docking, 1175
Molecular mechanics calculations, of free energies of hydration, 449
Molecular mechanics, calculations, of rotational barriers of silanes, 1523
Molecular mechanics calculations, on allyl cations, 533
Molecular mechanics calculations, on ammonium salts, 1371
Molecular mechanics calculations, on delocalized cations, 28
Molecular mechanics calculations, on nucleotides, 221
Molecular mechanics calculations, on 1,5-cyclootadiene, 254
Molecular mechanics calculations, on peptides, 1222
Molecular mechanics calculations, on polysaccharides, 351
Molecular mechanics calculations on proteins containing open shells, 1720
Molecular mechanics calculations, on proton transfer, 368
Molecular mechanics calculations, on pyrophosphate, 221
Molecular mechanics, calculations on sulfides and mercaptans, 1827
Molecular mechanics, non-atom centered contributions, 1632
Molecular mechanics/quantum mechanics combined calculations, 1484, 1496

Molecular shapes, comparison of, 1875, 1893
Molecular similarity, calculations of, 826, 934
Molecular similarity index, Carbó, 151
Molecular substructures, exhaustive enumeration of, 86
Molecular surface area, comparison with accessible surface area, 115
Molecular volume, 1113
Monte Carlo calculations, for conformational sampling, 2086
Monte Carlo calculations, for docking, 723
Monte Carlo calculations, of DNA dynamics, 2001
Monte Carlo calculations, of protein folding, 920
Monte Carlo calculations, of similarity indices, 1344
Monte Carlo calculations, of sodium atoms in argon, 381
Monte Carlo energy/free energy minimization, 240
Monte Carlo/stochastic method, 1750
Monte Carlo vibrational dynamics, quantum, 702

N-acetyl-*N'*-methylalaninamide, NMR calculations of, 126
Natural internal coordinates, in geometry optimization, 45
Neighboring group participation, *ab initio* calculations on, 1773
Neolignans, molecular mechanics calculations on, 712
Neopentane/methane dimers, *ab initio* calculations on, 70
Networks, general bookkeeping of coordinates, 1513
Neural networks, for estimation of correlation energy, 1407
NMR chemical shifts, calculation by GIAO method, 816
NMR shielding, calculation of by density functional theory, 126
NMR, multidimensional, general resonance assignments of, 139
Nucleic acids, see DNA
Nucleotides, molecular mechanics calculations on pyrophosphates, 221

1,5-cyclooctadiene, *ab initio* and molecular mechanics calculations on, 254
Oxygen, singlet, *ab initio* calculations of addition to ethanol, 1668

Parallel computing, in molecular dynamics, 478, 501
Parallel computing, of MP2 energies, 552
Parallel computing, second derivatives of Hartree-Fock energy, 159
Parallels computing, for configuration interaction, 430
Pattern recognition, for molecules, 1875
Peptides, *ab initio* calculations on β turns in, 1415
Peptides, conformational search for, 1971
Peptides, conformations of, umbrella sampling, 1450
Peptides, energy minimization of, 403
Peptides, free energy minimization of, from NMR data, 240
Peptides, free energy of hydration of, 1320
Peptides, new optimization method for energies of, 1222
Peptides, prediction of conformations of, 323
Periodic boundary conditions, in computational boxes of different shapes, 1930
Phosphole dimerization, *ab initio* calculations of, 198
Phosphorus (+1), reaction with silane, 9
Photooxidation, model for, 1668
Poisson–Boltzmann calculations, improvement of accuracy of, 268
Poisson–Boltzmann calculations, in conformational sampling, 1750
Poisson–Boltzmann equation, docking correction, 723
Poisson–Boltzmann equation, fast solution of, 569
Poisson–Boltzmann equation, for free energy of solvation, 1072
Poisson–Boltzmann equation, in dynamics, 1440
Poisson–Boltzmann equation, solution of, 343, 1570, 1591
Polarizability, in solvation calculations, 1061
Polymers, molecular dynamics, 1354
Polypeptides, see peptides
Polysaccharides, sulfated, molecular mechanics of, 351
Potential energy surface, for X + $H_2 \rightarrow XH + H$, 1167
Protein and peptide structures, comparison of, 1893
Protein backbones, from alpha carbon coordinates, 80
Protein folding, methods for calculations, 920
Protein-structures, united-residue representation, 849, 874
Proteins, essential dynamics of, 169
Proteins, hydrogen bonding in helix of, 1245
Proteins, molecular dynamics of, 1546
Proteins, open shell, molecular mechanics, calculations on, 1720
Proteins, also see peptides
Proton affinities, of aromatic hydrocarbons, 629
Proton transfer, in acetylacetone enol, 368
Proton transfer, solvent effects on, 1993
Pseudopotential calculations, on titanium and molybdenum complexes, 416

QSAR calculations, 1344
Quantum Monte Carlo vibrational dynamics, 702
Quantum mechanics/molecular dynamics method, 1760
Quantum mechanics/molecular mechanics, combined calculations, 1484, 1496

Relativistic corrections, to electron correlation, 20
Relativistic density functional theory calculations, molybdenum, and Tungsten derivatives, 1985
Resonance energies, *ab initio* calculation of, 584
Ribonucleic acids, see DNA
Rotovibronic fire structure, calculation of, 1312

Semiempirical calculations, atomic charges from, 744, 955
Semiempirical calculations, of electrostatic potentials, 301, 1682
Semiempirical calculations, of force constants, 2050

Semiempirical calculations, of proton affinities of aromatics, 629
Semiempirical calculations, on methane/neopentane dimers, 70
Semiempirical calculations, solvation in, 1
SHAKE algorithm, faster alternative for, 1463
Silane, reaction with P^+, 9
Silanes, rotational barriers of, 1523
Silica polymorphs, *ab initio*/molecular mechanics combined calculations, 463
Silicon cubic crystals, *ab initio* calculations of polarizability of, 1253
Silicon surfaces, density functional theory calculations of bonding to, 2075
Similarity function, maximization of, 826
Similarity indexes, Monte Carlo calculations on, 1344
Similarity, molecular, see molecular similarity
Simulated annealing, for determining peptide conformations, 323
Simulated annealing, in crystal indexing, 290
Small rings, *ab initio* isodesmic reaction energies of, 108
Sodium atoms, in argon fluid, 381
Solid-state reactions, activation energies of, 393
Solute, position of in simulations, 812
Solvation, continuum model of, in water, 1
Solvation, electrostatic calculations in, 569
Solvation, electrostatic potentials from dynamics, 313
Solvation energy, calculation of, 1072
Solvation, free energies, for small moleucles in water, 902
Solvation, hybrid QM/MM model for, 1061
Solvation, hydrophobic, 115
Solvation, Poisson–Boltzmann correction in docking, 723
Solvation, Poisson–Boltzmann equation for, 342
Solvation, position of solute in, 812
Solvation, solvent accessible surface, 1656
Solvent effects on proton transfer, density functional theory calculations on, 1993
Substructures, molecular, exhaustive enumeration of, 86
Sulfides, molecular mechanics calculations on, 1827
Superposition of molecules, calculations of, 638, 826
Surface property descriptors, effect, 182
Surface, solvent accessible, 1656

Transition metal complexes, optimization of, 45
Transition metal complexes, valence bond calculations on, 1863

Valence bond calculations, on transition metal complexes, 1863
Van der Waals parameters, from *ab initio* calculations, 211
van der Waals potentials, Ewald sums for, 1365
Vibrational dynamics, quantum Monte Carlo, 702
Vibrational spectra, improved simulation of with Cartesian coordinates, 646
Vibrational spectra, of isotopomers, 1282
Vitamin D, *ab initio* calculations on, 1647
Voronoi volumes, 1113

Xenon fluorides, relativistic calculations on, 601

Zeolite catalysis, embedded cluster model of, 562
